

THIS IS NOT CHANGE WE CAN BELIEVE IN

Home to polar bears, seals and wildlife seen nowhere else on earth, America's pristine Arctic Ocean is threatened.

Shell Oil bought leases to drill in the Arctic Ocean from the Bush administration. Those leases should've never been sold. Why? Cleaning up an oil spill in the Arctic Ocean is technologically impossible.

Right now the Obama administration has to decide whether they will rubber-stamp Bush's oil drilling or stop Arctic Ocean oil drilling before it is too late.

**CALL PRESIDENT OBAMA (202) 456-1414
TELL HIM, "STOP BUSH'S ARCTIC OIL DRILLING"**
